Abstract. This research investigates the changes in global trade patterns following the COVID-19 pandemic. By evaluating shifts in trade policies and economic resilience, the study provides insights into how countries can adapt to new challenges in the international trade environment.

Keywords: global trade, COVID-19, supply chain, trade policies, economic resilience

Introduction

The COVID-19 pandemic has profoundly affected global trade dynamics, leading to significant shifts in trade patterns and policies. This paper examines the impact of the pandemic on international trade, focusing on changes in supply chains, trade agreements, and economic resilience. Through a comprehensive analysis of post-COVID-19 trade data, we identify emerging trends and challenges that countries face in adapting to the new trade environment. The study also explores policy measures that can enhance economic resilience and support recovery in global trade.
