Abstract. This article delves into innovative strategies for urban governance within the public management framework. It discusses how smart city technologies and participatory governance can transform urban areas into more sustainable and livable environments. The paper presents case studies from cities that have successfully implemented these innovations.

Keywords: Urban Governance, Smart Cities, Sustainability, Participatory Governance, Public Management

Introduction

Urban governance is a crucial aspect of public management, especially in an era marked by rapid urbanization and technological advancement. This article explores innovative approaches to managing urban areas through the lens of public management. It focuses on the integration of smart city technologies and participatory governance models to create sustainable, efficient, and livable urban environments. By showcasing successful case studies from around the world, the article highlights the transformative potential of these innovations. It also discusses the challenges and considerations needed to implement these strategies effectively.
