Abstract. This article examines the relationship between theological perspectives and ecological ethics, investigating how religious teachings shape attitudes towards environmental responsibility. By analyzing theological contributions from Christianity, Buddhism, and Indigenous traditions, the study highlights the moral imperatives that drive ecological advocacy within these belief systems.

Keywords: Theology, Ecology, Ethics, Christianity, Buddhism

Introduction

The intersection of theology and ecological ethics has gained prominence as environmental issues become increasingly urgent. This article explores how different religious traditions incorporate ecological concerns into their moral frameworks, shaping followers' attitudes towards the environment. By examining theological perspectives from Christianity, Buddhism, and Indigenous traditions, the study reveals the diverse ways in which religious teachings promote environmental stewardship. These insights into theological contributions offer a deeper understanding of the moral imperatives that underpin ecological advocacy, emphasizing the role of religion in fostering sustainable practices and environmental consciousness in the modern world.
