Abstract. This article examines the intersection of religion and environmental ethics, analyzing how different religious traditions approach ecological issues. By comparing theological perspectives and ethical teachings, the study explores the potential for religious frameworks to contribute to environmental sustainability. The research highlights the role of religion in shaping environmental consciousness and action.

Keywords: environmental ethics, religion, sustainability, ecology, theological perspectives

Introduction

The growing environmental crisis has prompted a reevaluation of ethical values across various domains, including religion. This article explores the relationship between religion and environmental ethics, focusing on how different religious traditions address ecological concerns. The paper provides a comparative analysis of theological perspectives and ethical teachings, highlighting the potential of religious frameworks to inform environmental sustainability efforts. The study underscores the role of religion in fostering environmental consciousness and motivating action towards ecological preservation.
